Bonura Building

Company Philosophy

Bonura Building was founded in July, 1992, by principal C.J. Bonura, a licensed architect and licensed general contractor in the State of California. After receiving his Bachelor's Degree in Architecture from the Southern California Institute of Architecture (SCI-Arc), C.J. Bonura worked for Frank O. Gehry & Associates for 6 years, prior to starting his own practice. C.J. Bonura's experience as an architect and a general contractor is a valuable asset to his clients.

Areas of Expertise/Recent Projects

The firm has worked exclusively in the Los Angeles area. To date, the firm's residential projects include remodels, ground-up custom homes, and restoration of mid-century modern architecture, as well as commercial remodels. Generally, Bonura Building takes on projects with a budget of $300,000 and up, with an average per square foot price starting at $120 for interior remodeling, and $300 per square foot for new additions. However, depending on scheduling, smaller projects are considered. Design/build services are also offered.
