## Company Philosophy

Maggy Geiger opened The Window Box in 1975 after receiving her training at WaveHill, the world renown public garden in the Bronx.
Our most important design philosophy has always been to discover what the clientwants and to find the best way to give that to them. We believe strongly inestablishing a personal relationship with our clients and their gardens and havepurposely kept our business small so that we can be available to you in person.
We have always said our approach to gardening is Soup to Nuts. We are with youevery step of the way from design to installation with a particular emphasis onmaintenance to ensure that your garden is always glorious.

## Areas of Expertise/Recent Projects

New projects are always on the horizon and we are thrilled that every yearbrings new opportunities to beautify our city and its surroundings.
Recent projects include a three year townhouse renovation with multiple gardensand terraces integrated into the renovation; two large "instant garden"penthouses installed from the ground up and of course many rooftops, penthouses,terraces and garden plots throughout the city from Tribeca to the Upper EastSide. We also continue to provide both interior and exterior garden and floraldisplays for hotels, restaurants, commercial and residential buildingsthroughout the city.
