Paula McDonald Design Build & Interiors

Company Philosophy

We brought our service business and philosophy to create products (in baths, built-ins, radiator & A/C covers, etc.) that solve urban space needs. We integrate clean lines and contemporary sensibilities in modern to traditional product lines that are easily customized for each space.

Areas of Expertise/Recent Projects

We bring our product concept to life from hands on custom residential building experience. The persistent dilemma for the majority of dwellings in NYC is not enough space! And, some of the most conspicuous apartment elements to solve are the radiator and air conditioner covers as well as storage solutions. Our furniture design approach, quality, and experience in creating these spaces enables us to deliver products from modern to traditional design detailing, finishes, and hardware that fits any lifestyle. Regardless of the perspective, our products are timeless.
