Ultimate Sound & Installations

Company Philosophy

Our approach to systems integration begins with great design. We start by listening carefully to the needs of our clients and guide them to technology solutions that simplify and enhance their lives. We provide the latest advances in systems integration technology with the flexibility for advancements in the future, from the best home theatre system to wireless home automation.

Areas of Expertise/Recent Projects

We have worked consistently with top designers and architects and pride ourselves on creating unique technology solutions that blend seamlessly into their world class designs. Recently we completed a very high profile AV installation in a Manhattan high rise apartment for a billionaire client with a fabulous art collection. Art was the feature. We made the technology transparent.
