CONDE Construction

Company Philosophy

CONDE Construction is a general contracting/ construction management firm specializing in upscale residential renovations. For more than 14 years, we have been exceeding our clients' expectations by delivering high-quality craftsmanship and solid project management. We have earned a reputation for complete dependability by consistently completing jobs on time and on budget.

Because the principals at CONDE are trained in architecture, we believe we have a competitive edge in accomplishing the goals – and of achieving the vision – set by architects and clients on specific projects. We have a better understanding of architects' drawings and plans than most contractors and consider ourselves respectful partners with architects in working together productively.

CONDE takes pride in satisfying our clients while resolving any complications that arise with a minimum of trouble. We resolve most issues before the client is even aware that there was one by working and communicating with the design team.
