Design Development NYC

Company Philosophy

Design Development NYC has earned a reputation for excellence through hands-on experience.
We know that every project is unique. That is why we listen first, then tailor our services to fit each client's specific needs. Our managing partners remain actively involved in every step of the process—whether we are called in to do a simple spruce-up with custom millwork, plaster, and paint; remodel a kitchen or bath; gut renovate an apartment, town house, or loft; or rehabilitate a commercial or residential building from the ground up.
By combining the capabilities of architect, engineer, construction manager, skilled trades, and interior designer into a single entity, our design/build approach to remodeling, renovation, restoration, and new construction offers clients a streamlined process, competitive pricing, and a single point of accountability, from start to finish.
From our wide range of services, clients choose those that suit their location, vision, and budget.

Areas of Expertise/Recent Projects

Design Development NYC understands the ins-and-outs of building in New York.
Strategically located in the heart of Long Island City, we are ready to respond to our clients needs on the spot. Our construction management teams are LEED licensed and fully Green compliant. And our 10,000-square-foot operating facility allows us to deliver the highest quality services and custom product at the most competitive prices.
We value our clients' investment and are committed to their satisfaction.
