Embassy Cleaners

Company Philosophy

Embassy Cleaners is a high end cleaner with a deep knowledge of fine fabrics, upholstery, and carpets. Founded in 1937, Embassy Cleaners' mission has always remained the same: To continually deliver the highest quality workmanship to each and every client, and share their love for their prized possessions by helping them look beautiful and new once again.
The interior design community is vast in number, but tight-knit, and Embassy Cleaners is proud to be one of the few cleaners that designers regularly recommend to their clients to clean their fine fabric draperies, upholstered furniture and walls, and fine rugs and carpets. Embassy Cleaners is recommended by designers and high-end workrooms in Manhattan and elsewhere, including Eve Robinson and Associates, Manhattan Shade and Glass, J. Paul, Carol Kurth Architects, and Beckenstein Fabric and Interiors. A representative list of our commercial clients.

Areas of Expertise/Recent Projects

With vast experience working with the finest fabrics and fibers, as well as the most appropriate cleaning techniques, Embassy Cleaners prides itself on being selected as one of America's Best Cleaners. Our steadfast attention to detail and commitment to the finest artisanal methods produce results that have earned us a reputation as the go-to source for New York's most renowned designers and architects.
Your draperies and window treatments are cleaned on-site, right where they hang in your home or place of business, or if preferred, they can be removed to be cleaned off-site in our facility and then rehung by our trained and experienced staff. Upholstered furniture and wall coverings are cleaned using either a wet cleaning process, or a solvent-based method, depending upon which cleaning technique is most appropriate for your upholstery. Both processes utilize environmentally friendly cleaning solutions. This range of cleaning techniques allows us to effectively clean a broad range of fabrics, including silk, wool, cashmere, mohair, linen, and chintz, to name a few.
Accustomed to working primarily at the high-end, we regularly provide a service that meets the expectations of our most discerning clientele.
