Project Management Collaborative, LLC

Company Philosophy

PMC's goal is to represent you, to get your project completed in a timely manner and within budget. Knowing that changes and unforeseen issues can arise, we strive to take everything into consideration, as no detail is too small, before construction can begin, thus avoiding costly change orders and delay. PMC will manage and oversee all work costs, meet with you and/or your consultants and contractors on a regular basis throughout the construction process in order to ensure good communication and comprehension of the scope of work required.

Areas of Expertise/Recent Projects

Project Management Collaborative, LLC offers a full service of construction management services, providing considerable benefits for our clients. We have successfully completed hundreds of complex, high-end residential and commercial projects ranging in size from 1,000 to 600,000 square feet. The importance of early planning and preconstruction services allows us to customize a scope of work catering to each project's needs, which will provide the proper leadership to end up with a well-managed team which equals a timely completion.
