Adams Interior Design

Company Philosophy

I was raised on an organic cattle farm in rural Western Massachusetts. With loving parents and a passion for the arts, I moved to NYC at 18 years old and studied interior design at the Fashion Institute of Technology. Having worked for some of NYC most respected architects and designers, I decided to open my firm Adams ID in 2009. Since then I have had the opportunity to design, contemporary Soho lofts, restore an 1800's federal style home in New England and design numerous homes throughout New York , Palm Beach and the Hamptons.
No two projects are the same but the fundamental approach and framework are; identify the objective, build a concept, find solutions and start laying the paths for completion and execute. With respect for the process, trust and good energy the outcome can be nothing but perfect.
