

Graphic Builders Inc.

Company Philosophy

At Graphic Builders Inc., our mission is to build clients for life: we accomplish this by accepting a limited number of custom, one-of-a-kind projects personally managed by the firm's principals. This guarantees your project will receive the attention and focus it deserves, maintain the highest standards of quality and craftsmanship and be delivered on schedule and on budget. We believe in preparing comprehensive proposals – not estimates or bids - so budget over-runs and unexpected Change Orders are never an issue. Our highly personalized service is competitively priced due to our ability to keep overhead low with corporate offices located in Bergen County only 5 minutes from the George Washington Bridge. With over 20-years experience exclusively managing complex high-end Manhattan residential renovations, you can trust our long-term relationships with the industry's most skilled and reliable architects and subcontractors; those who understand best practices, teamwork and deadlines who will make your project their priority and do the job right the first time. You can also trust our reputation for working within the confines of co-op boards and building management companies to deliver a successful project that addresses the needs and concerns of all parties involved.

Areas of Expertise/Recent Projects

Recent projects include a 3,000 sq. ft. complete gut and renovation with new electrical throughout and service upgrade, new HVAC and humidification system, 3 new baths with imported European tile, new kitchen, pantry and dressing room, custom plaster crown moulding, custom base to match original details, new wood floors and Farrow & Ball paint.

Our projects reflect the dreams, tastes and lifestyles of the people who live in the homes we renovate and the architectural and design teams who bring this vision to life. Whether classic or contemporary, we believe that successful complex renovations require a few key elements and would be happy to review this in our Service Overview. A portfolio of our work is also available; please contact our office to arrange an appointment.
