Interior Management, LLC

Company Philosophy

With over 30 years of experience, Interior Management is Manhattan's principal construction management and general contracting firm, distinguished by it's meticulous execution, extraordinary workmanship and exceptional service.
It is these skills, combined with IMI's team of construction experts and their lengthy portfolio of satisfied clients, that generated a demand for their services to extend out East.
Ultimately, this company's distinction lies in it's reputation. IMI has never advertised, so the tremendous growth it has experienced can be attributed solely to exemplary referrals from their previous clients, thus confirming IMI's uncompromising dedication for perfection.

Areas of Expertise/Recent Projects

Proudly collaborating with the city's most exacting residents, Interior Management insists on creating homes that are nothing short of museum quality. This can be attested to by the finest architects and designers in town, who also commend IMI's ability to complete massive renovations under stringent time restraints in NYC's "Summer construction only" buildings.
