RoseHyll Studio

Company Philosophy

Our mission is to make the fabrication process as seamless as possible by working with interior designers and architects to create unique, high-end window treatments, bedding, pillows, and upholstered walls.

Areas of Expertise/Recent Projects

We are just starting to work on a new project for one of our New York designers which is very exciting. It's the main living room for a large residence. The ceiling height is about 30 feet. Along with beautifully embroidered fabrics embellished with layering of contrast fabric & trims, there is a large Austrian shade that we are motorizing so that the client will have the operating controls at their fingertips. Everything will be mounted into a specially built frame to support the enormous weight of the treatment. The scope of this project is something most workrooms wouldn't take on.
